

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## CLASSIFIED ADS

### LIVING AMOEBA

In addition to the widely used biological types, we specialize in important southern species not obtainable elsewhere.

Twelve months service on living material such as giant bullfrogs, alligators, turtles, crayfish, etc.

Write for information and prices.

All Material Guaranteed

**SOUTHERN BIOLOGICAL  
SUPPLY COMPANY, Inc.**

Natural History Building

New Orleans, La.

Established 1883 Without Intermission 1916

### A. A. SPHUNG

#### *The Frog and Turtle Man*

Live Frogs, Turtles, Crayfish, Clams, Earthworms. Also preserved materials shipped to all parts of the world.

*Write for Price List  
Lists Free*

NORTH JUDSON, INDIANA

### **Powers & Powers** HIGH GRADE Microscopic Slides AND Living Micro-Organisms

*Living Amaba, Proteus and Living Fresh Water Hydra.*—We were the first in America to develop the rearing and shipping of these organisms to all parts of the continent. We ship to every State in the Union and even as far as Nova Scotia. Living delivery always guaranteed within the months of the school year. We have a private plant of our own especially adapted to these and other micro-organisms.

*Microscopic Slides.*—We have a growing list of high grade preparations for the microscope, chiefly in zoology. We endeavor to produce slides of unusual excellence. Many are quite unprocureable elsewhere.

*Circulars and Prices Upon Application*

**POWERS & POWERS**  
Station A LINCOLN, NEBR.

### Marine Biological Laboratory

Woods Hole, Massachusetts

### Biological Material

1. ZOOLOGY. Preserved material of all types of animals for class work and for the museum.
2. EMBRYOLOGY. Stages of some invertebrates, fishes (including Acanthias, Amia and Lepidosteus), Amphibia, and some mammals.

3. BOTANY. Preserved material of Algae, Fungi, Liverworts, and Mosses.

Price lists furnished on application to  
GEORGE M. GRAY, Curator  
Woods Hole, Mass.

Correspondence solicited on special orders, e.g., giving marine or aquatic material.

Michigan Biological Supply Company

Nickels Arcade

Ann Arbor, Mich.

## Pave the Way to Pleasant Teaching

When we send you **Biological Supplies** we try to fill your order with as much care as though we ourselves were to use the material.

We know that the class period is spoiled if the material is poor or if it does not arrive on time.

Your rush order leaves our stock room within twenty four hours and many cases is on its way within three or four hours after your letter or telegram reaches us.

Our Catalogs include **Apparatus, Preserved Material, Live Material, Life Histories, Lantern Slides, Stains and Chemicals, Microscope slides, Skeletons, Models, etc.**

We absolutely guarantee your satisfaction.

## WARD'S NATURAL SCIENCE ESTABLISHMENT

84-102 COLLEGE AVE.,  
ROCHESTER, N. Y.

Natural History Specimens of all kinds.

Sole American agents for the special microscopic preparations of Dr. Sigmund, which include Physiological Histology of Man and Mammalian Animals, 10 parts, 100 slides.

Comparative Histology of Vertebrate Animals, 5 parts, 50 slides.

Anatomy and Development of Phanerogams, 10 parts, 100 slides. Write for special circulars describing these preparations.

Free circulars in all departments: Biology, Entomology, Mineralogy, Geology, Paleontology and Taxidermy.

## The Collegiate Press

Our specialization in college and university printing has equipped us to give our customers unexcelled service combined with best quality work at moderate prices.

We shall be glad to have members of the Society write at any time for quotations on material they wish to publish in book or pamphlet form, or for rates on accurate drawings or engravings of microscopic subjects.

Careful attention will likewise be given to requests for stationery and blank forms.

### THE SILVERMAN ILLUMINATOR

offers important advantages for practically every application of the  
Microscope:

- a—It shows more detail.
  - b—A clearer and better defined picture is presented to the eye and the camera.
  - c—Several novel methods of illumination can be provided.
  - d—It saves much valuable time.
  - e—It prevents eye strain, eye fatigue and brain fag.
  - f—It can be lowered into deep hollow objects.
  - g—It gives excellent results for very low power work as well as higher magnifications, also in oil immersion work.
  - h—It can be used *with any microscope, ordinary or binocular.*
- A small circular tube lamp surrounds the objective and furnishes a diffused and uniform illumination directly where it is needed.

The Silverman Illuminator marks A GREAT ADVANCE in Microscope  
Illumination

# A Binocular Microscope for Research Work

Microscope CAE, binocular type, using Single Objectives for the full range of powers, is a most useful instrument for prolonged observation. It is used with great satisfaction by leading research workers. The following advantages are offered:

Microscope CAE8  
Price \$240.00

As the eyepiece tubes are mounted in a parallel position, both eyes are used in the proper posture, eliminating eyestrain.

The user is given the impression of increased penetrating power, permitting him better to interpret what is seen.

It yields brilliancy of field and improved quality of image.

Provides maximum range for adjustment for interpupillary distance; left eyepiece is adjustable.

As the right eyepiece is rigid and vertical, the Camera Lucida may be used if desired.

Write for literature or information  
on this, or other, Bausch & Lomb  
Microscopes and Accessories

## Bausch & Lomb Optical Co.

552 St. Paul St., Rochester, N. Y.

New York Chicago Washington San Francisco London

Makers of Photographic Lenses, Microscopes, Projection Apparatus (Balopticons), Ophthalmic Lenses and Instruments, Photomicrographic Apparatus, Range Finders and Gun Sights for Army and Navy, Searchlight Reflectors, Stereo-Prism Binoculars, Magnifiers and Other High-Grade Optical Products.

# New Leitz Combination Microscope Stand "ABM"

The Latest Research Model for  
Binocular and Monocular Vision

Microscope "ABM" with  
Binocular Body Tube Attached

## FEATURES:

1. In general design it is similar to our large Research Stand "AA."
2. Binocular—and Monocular Body Tubes can be very easily interchanged and attached by eccentrically acting lever-clamp.
3. The Nosepiece adapter is mounted independent of the tubes; objectives remain permanently centered, irrespective of which tube is used.
4. With the Binocular Body Tube attached the stand is in every respect equal to our "Mon-Objective Binocular" Microscope.
5. With the Monocular Body Tube attached it is identical with our Research Stand "AA," available for Micro-Photography.

Monocular Tube Interchangeable  
with Binocular Body Tube

With this achievement Leitz has scored another success as originator of new microscope models of the "Leitz Quality of Optical and mechanical workmanship." "Leitz Quality" is beyond comparison, it is accepted as "Supreme."

Pamphlet No. D-1022 will  
be forwarded upon request.

# Spencer Scientific Instruments

whether  
MICROSCOPES, MICROTOMES,  
DELINEASCOPES, TELESCOPES,  
PHOTO-MICROSCOPIC CAMERAS OR  
OTHER APPARATUS,

MAKE  
AN  
INSTINCTIVE  
APPEAL  
TO THE  
LABORATORY WORKER

It isn't only their accuracy and utility, it's something in the finish, even more in the design, but in addition to all these, it is those little things—clever little devices, which accomplish the same end, but in a better way—exactly the way that the laboratory worker wants them.

These are the distinctive features of Spencer instruments, made distinctive because our designers—experienced laboratory men, possess the laboratory view-point.

No. 3 H Mon-Objective Binocular

## SPENCER MON-OBJECTIVE BINOCULAR MICROSCOPES

Possess all the features of construction which experience has shown to be meritorious and advantageous. Among them is one very distinctive feature which distinguishes the Spencer from all others, viz.:

### CONVERGENT EYEPIECE TUBES

which avoids the excessive and false conception of perspective otherwise produced, giving a correct interpretation of the object under examination.

# Watson's Van Heurck Microscopes

Hand-made instruments of the finest quality in the world, giving effects in high-power work that can be secured by no other means.

Every mechanical movement that will afford increased accuracy and comfort is incorporated in the instrument illustrated.

## The Grand Model Van Heurck Microscope

Watson & Sons are the only manufacturers in the World of Microscopes of highest class.

Catalogues sent post free on application to

**W. WATSON & SONS, Limited**

Established 1837.

313, HIGH HOLBORN, LONDON, ENGLAND

Attention of members of the  
**AMERICAN MICROSCOPICAL SOCIETY**

is called to the announcement of Grants  
from the Spencer-Tolles Research Fund.

(See *TRANSACTIONS*, July, 1913)

These awards are to stimulate and aid research in  
Microscopic work

1. The Grantee must be a member of the Society.
2. Resulting discoveries must first be offered for publication in the Society Transactions.
3. Application should be made to Dr. Henry B. Ward, Chm., Urbana, Ill.

**NOTICE TO MEMBERS**

The Secretary-Editor desires to secure information concerning sets, partial sets, or odd volumes of the *TRANSACTIONS* which might be secured for the Society either by gift or purchase. Members knowing of such possibilities are earnestly requested to communicate with the Secretary. The earlier volumes are especially needed.

The Secretary will consider it a favor if members will notify him of non-receipt of numbers of the *TRANSACTIONS*, and of changes of address.

Correspondence relative to membership, publication, exchanges, advertising, etc., should be addressed to the Secretary-Editor.

PAUL S. WELCH,  
*Secretary-Editor*

*University of Michigan,  
Ann Arbor, Michigan.*
